

Martin Friedgut

Senior Associate, Electrical/ICT team
E: martin.friedgut@sprusons.com.au

Martin Friedgut brings considerable industry experience to his role, with solid expertise in the fields of telecommunications and information technology. Prior to joining Spruson & Ferguson in 1997, Martin was responsible for planning the introduction of broadband transmission and switching technology into the international network of Australia's major telecommunications provider, Telstra. Before that he was active in research into advanced microwave and optical components and systems for telecommunications, as well as in power electronics and electronics manufacture.

Martin's current practice includes patent drafting and prosecution, with particular focus on Australian, US and European applications, in a broad range of fields. These include telecommunications and computers, software, signal processing, medical imaging systems, bioinformatics, and business processes.

He also has experience in oppositions before the Australian Patent Office, and has prepared validity and infringement opinions in contentious matters. Martin is the author and co-author of several articles in scientific publications.
